updating your plan

As your situation changes with each major life event (the birth of a child, a promotion, a divorce, etc.), your finances change too! It is important to work with your advisor to update your plan.

diversify your investments?

The different asset types do not all undergo the same fluctuations. Frequently, bonds are up while stocks are down. The more you diversify the types of assets in your portfolio, the more you reduce the risks associated with market volatility.

Annual return in percentage by asset category in local currency (2008 to 2023)

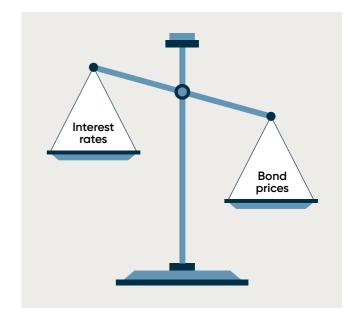

2008	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	-
8.3	52.0	17.6	10.0	16.0	41.3	23.9	21.6	21.1	28.7	4.2	24.8	16.6	27.6	-4.0	22.9

Click on the numbers in the graph to see the names of the corresponding assets.

to counter interest rate increases

Given that bond prices generally move inversely to interest rates, a rate increase has a negative impact on bonds. The negative impact can be tempered by diversifying the portfolio using different asset classes that have a lower correlation with the FTSE TMX Canada Universe Bond Index.

The later you start, the higher your annual contribution will have to be. For example, if you start saving for retirement at age 50, you may have to put aside more than 50% of your yearly gross income. Achieve your goals with ease by beginning as early as possible.

Annual contribution necessary to reach a target amount by age 65

- Starting at age 30 contribution of 18.00% of gross income
- Starting at age 40 contribution of 27.64% of gross income
- Starting at age 50 contribution of 50.39% of gross income

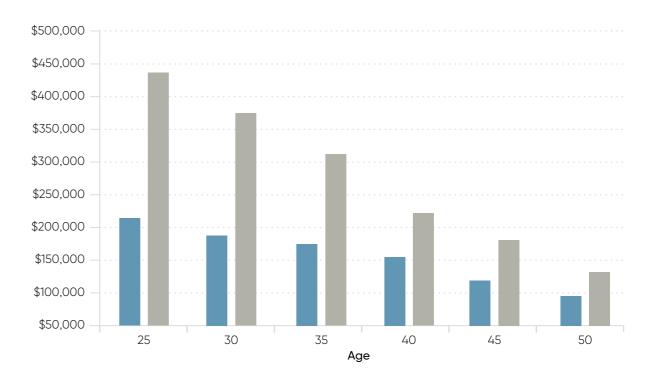

If you start saving early, you may end up with more than double the capital you invested!

Accumulated savings at age 65 after annual investments of 10% of the gross income¹ (starting gross annual income at age 25: \$35,000)

Age when you start saving	Total contributions	Total value at age 65 ²
25	\$211,407	\$446,610
30	\$193,193	\$372,835
35	\$173,083	\$305,075
40	\$150,880	\$242,840
45	\$126,366	\$185,680
50	\$99,301	\$133,181

^{1.} Gross annual income indexed at 2%.

^{2.} Based on an effective annual return rate of 3.75%.

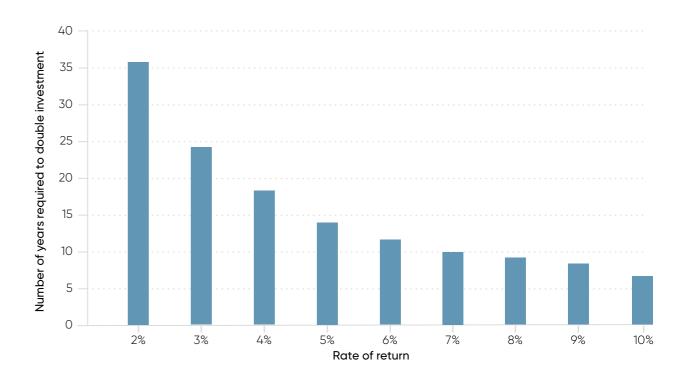

investments?

A higher risk tolerance is required for expectations of more attractive returns.

investment to double its value?

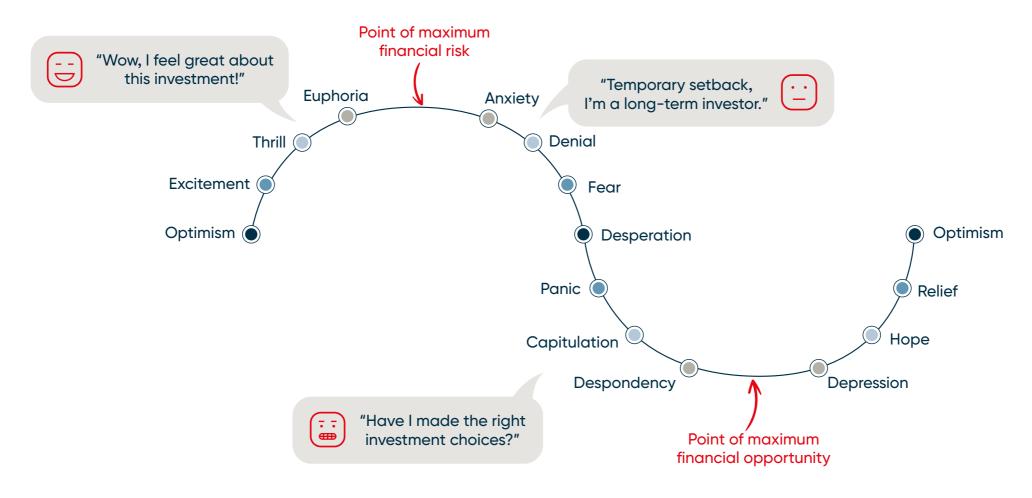

The rule of 72 allows us to roughly identify how many years it will take for an investment's value to double: simply divide 72 by the interest obtained for your investment.

Rate of return	Number of years required to double investment
2%	36
3%	24
4%	18
5%	14
6%	12
7%	10
8%	9
9%	8
10%	7

emotions influence your choices?

Emotions can lead to making rushed decisions when it comes to your investments. To manage your emotions, identify the scenarios (market correction, drop in value of securities, etc.) in which you may act irrationally.

How do financial fluctuations impact

your portfolio?

The graph below shows that despite momentary dips during crises, the long-term trend is on the rise.

Growth of \$100 invested in the S&P/TSX Total Return Index

	1968 USSR invades Czechoslovakia	1991 Coup d'état in Russia	2011 U.S. debt downgraded, threat of double dip recess		
	1970 US invades Cambodia – new peak in Vietnam War	1993 Bombing of World Trade Center	2012 European crisis: debt, unemployment, austerity		
00 -	1971 Wage / price freezes in the U.S.	1995 Second Quebec referendum	2013 U.S. budget crisis, weak growth in China		
	1973 Energy crisis / Arab oil embargo	1997 "Asian Flu" financial crisis	2014 Crisis in Ukraine		
	1974 Nixon resigns to pre-empt impeachment	1999 Y2K paranoia	2015 Paris attacks		
0 –	1975 Clouded economic prospects	2000 Tech bubble bursts	2016 Brexit and U.S. elections		
	1977 Markets begin a major slump	2001 9-11 terrorist attacks	2017 Increase in key interest rate in Canada		
	1978 Interest rates rise – Stagflation	2002 Major accounting scandals sap confidence in financial system	and the United States		
00 –	1979 USSR invades Afghanistan	2003 War in Iraq	2018 U.S. trade rates/NAFTA renegotiation		
	1980 Oil prices skyrocket – First Quebec referendum	2005 London metro and bus bombings	2019 U.SChina trade conflict		
	1981 Short-term interest rates in Canada hit 21%	2007 Subprime crisis	2020 Global health crisis – COVID-19 2021		
00 –	1982 Falklands War	2008 Global financial system near collapse	2022 Major increase in key interest rate in Canada		
	1990 Persian Gulf crisis / Iraq invades Kuwait	2009 Major equity markets 50% below their peaks	2023 and the United States		

Should you hold on to your investments

Basics Education Project Financial health Retirement Solutions

during market fluctuations?

As the saying goes, a picture is worth a thousand words. As you can see in the graph below, those who stayed invested in the market during the financial crisis of 2008 obtained a much greater yield over 10 years than those who temporarily withdrew their stocks.

- Stayed invested in the stock market
- Exited market and reinvested after 1 year
 - Exited market and invested in cash
- Recession

How many times have you

successfully timed the markets?

In the long run, what truly matters is the frequency of savings and passage of time, not market timing.

- Buying at year low
- Buying at month start (monthly systematic investment)
- Buying at year high

pursuing your goals?

All asset categories undergo variations over time, but in the long term, they tend to evolve favourably. Regardless of your portfolio's composition, it is important to stay the course in pursuing your goals and to think about the long term.

Dividends appear as a contribution to the ever-increasing overall performance over an investment's lifetime.

S&P/TSX Total Return Index

S&P/TSX Composite

in line with your needs

Investing in several GICs with different maturity dates allows you to anticipate fluctuating interest rates while having access to part of your invested principal each year and take advantage of more attractive long-term rates.

		Year 1	Year 2	Year 3	Year 4	Year 5	Year 6	Year 7	Year 8	Year 9	Year 10
Initial investment \$30,000	\$5,000	Cash solutions	S								
	\$5,000	1-year GIC	5-year GIC					5-year GIC			
	\$5,000	2-year GIC		5-year GIC					5-year GIC		
	\$5,000	3-year GIC			5-year GIC					5-year GIC	
	\$5,000	4-year GIC				5-year GIC					5-year GIC
	\$5,000	5-year GIC					5-year GIC				

Laddering PLUS

Adding a market-linked GIC to each strategy allows you to increase your potential return with exposure to a diversified equity portfolio or a reference index of low-volatility securities.

Saving for education

Do you have a plan for your children's education?			
Are you fully benefiting from government grants?	21		

for your children's education?

DID YOU KNOW?

 Average tuition for a full-time undergraduate student in Canada is

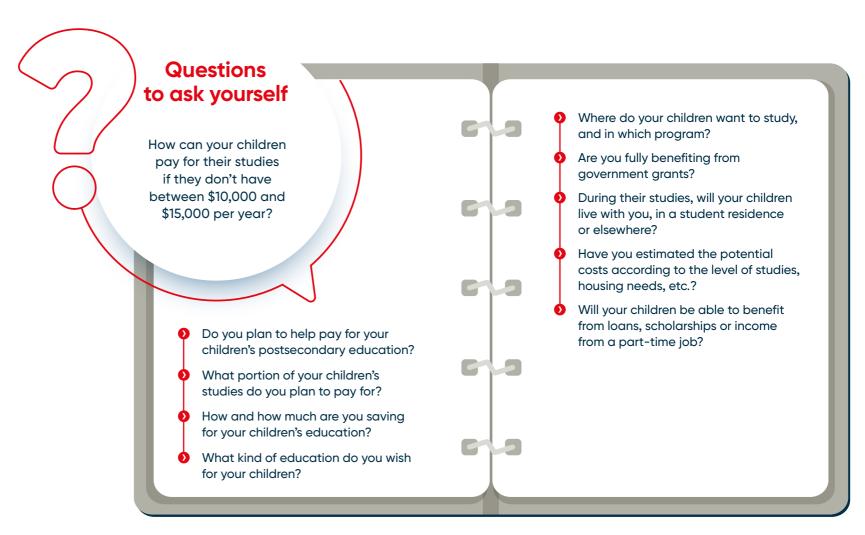

\$8,167 for the 2023-2024 school year.¹

The average annual RESP contribution for children who receive the CESG is \$1,764, while average annual withdrawals per student stood at \$10,115 in 2021.2

one out of every two postsecondary students has student debt upon graduation.³

from government grants?

Many government grants exist to help you maximize the RESP contributions.

TIPI

Did you know that the federal government can subsidize up to \$7,200 of your children's education?

Saving for a project

Do you have a clear plan for saving for a project?		
How does systematic saving work?	24	

for saving for a project?

DID YOU KNOW?

→ 65% of Canadians have a major purchase or expense planned during the next 3 years.1

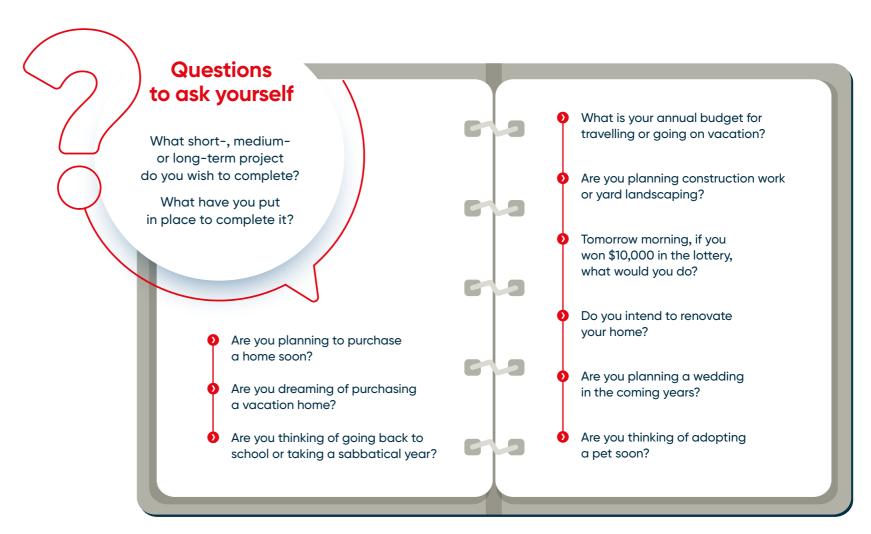

46% of Canadians say savina more helps them reduce stress.²

Over half (55%) of **Canadians** reportedly considered changing jobs in 2021.3

systematic saving work?

Systematic saving consists in setting up automatic debits of a specific amount at specific intervals.

For example, you may decide to set aside \$25 per week for an undetermined duration or \$100 per month for one year.

Evolution of the portfolio value based on the monthly savings amount

4 good reasons to save systematically

- It's worthwhile: The earlier you start, the quicker your savings will increase.
- It's accessible: Putting aside smaller amounts regularly is easier than putting aside one big sum all at once.
- It's simple: Set up automatic debits once, and that's it!
- It's practical: Choose the frequency and amount that best suit you.

Monthly savings

\$250

\$200

\$100

\$5

\$25

Assumption: Calculation based on an effective return of 3.75%.

Financial health

Do you have enough money to get you through		
unexpected events?		
10 Tips to reach financial health	27	

to get you through unexpected events?

DID YOU KNOW?

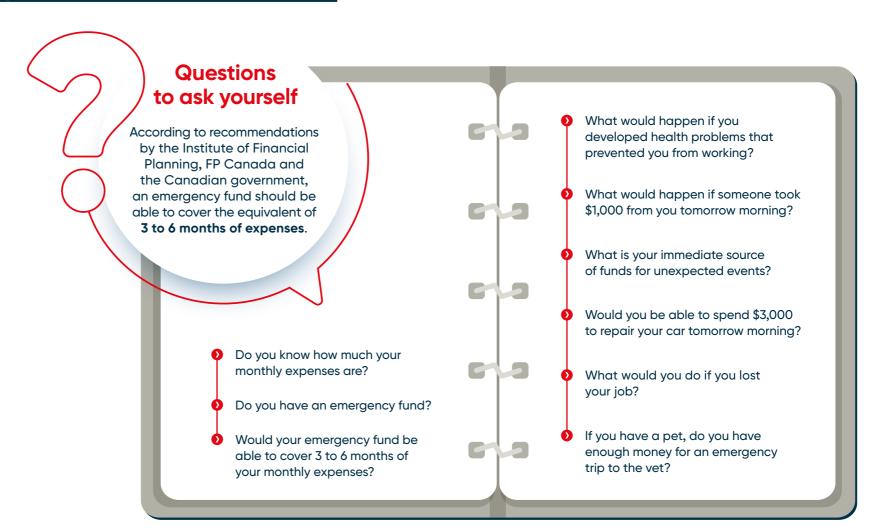

O > 1 out of 3 Canadians doesn't have an emergency fund covering the equivalent of 3 months of expenses.1

54% of Canadians say they are living from paycheque to paycheque.2

> 78% of Canadians say their personal financial situation has grown worse because of inflation.²

financial health

No one is immune to financial problems. Poor planning or going through a tough time, such as a divorce, illness or unemployment, can really tip the scales. Need help? Here are 10 tips to guide you.

Your advisor can accompany and advise you in building a financial plan.

Prefer doing it on your own? Not to worry, our **nbc.ca/advice** site has everything to support you!

Saving for retirement

38

to retire?

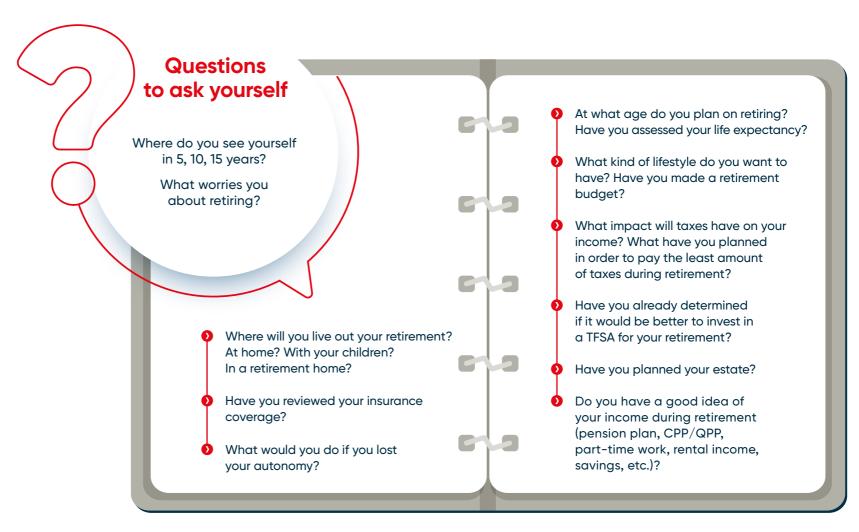

DID YOU KNOW?

- > 67% of Canadians surveyed feel they have fallen behind in their retirement savinas.1
- > 72% of Canadians that are currently working with an Advisor rate their financial well-being to be good to excellent (7 or more out of 10) compared to 48% of households that are not working with an Advisor as of February 2023.2

54% of Canadians don't have a retirement plan.1

for retirement?

In certain cases, public plans aren't enough to live retirement to its fullest. Saving will allow you to get the most out of your retirement.

For a retiree with pre-retirement income of \$60,000 and no savings, government plans will replace the equivalent of 45.7% of their gross annual income before retirement. However, if the retiree's savings were sufficient to replace 70% of their pre-retirement income, they would lose the Guaranteed Income Supplement. The individual contribution therefore has to be 31.2%.

Underestimating your life expectancy

According to recent statistics, if you are currently 60 years old, you or your partner have a 50% chance of living to the age of 94.

these 5 retirement risks?

Not accounting for inflation

Essential goods undergo the largest fluctuations.

Forgetting to plan for healthcare expenses

Starting at age 70, healthcare costs for Canadians tend to nearly double every 10 years.

4. Withdrawing too much money

It is crucial to properly calculate how much money to withdraw so that you don't use up your capital too quickly. In the example chart, we can see that someone who takes out 10% of their assets each year (weighted for inflation) will run out of money at age 80.

5. Only opting for low-risk investments, thereby reducing potential yield

Properly allocating your investments helps make your capital last longer. In the example below, we see that Portfolio C generates a higher yield than Portfolio A for the same level of risk.

It all depends on your situation. An RRSP is a long-term retirement-savings account that is tax-deductible and taxable upon withdrawal. TFSAs are not tax-deductible; however, upon withdrawal, the amount withdrawn is non-taxable. The FHSA is a savings account meant for first-time home purchase. Contrary to RRSPs, withdrawing from a TFSA and a FHSA does not reduce your government benefits. Learn about the main differences and similarities between the three products here.

	RRSP	TFSA	FHSA
Who is eligible?	Any Canadian resident age 71 and under who earned income in the previous year (subject to pension adjustment)	Any Canadian resident aged 18 and over ²	Any Canadian resident between the ages of 18 ⁴ and 71 who, at any prior time in the calendar year or in the preceding 4 calendar years, inhabits as a principal place of residence a qualifying home in Canada or not, owned or co-owned by them or their current spouse or common-law partner
How much is the authorized annual contribution?	18% of income earned up to the allowed annual maximum ¹	\$7,000 ³	\$8,000, with a lifetime limit of \$40,000 ⁵
How is the contribution ceiling indexed?	Indexed for inflation using the Industrial Aggregate average wages and salaries in Canada	According to the Consumer Price Index, rounded to the nearest \$500	This amount will not be adjusted for cost of living or inflation
Can the contributions be deducted from taxable income?	Yes	No	Yes
Are contributions to a spouse permitted?	Yes	No, but a person could make a donation or a loan to their spouse for the latter to contribute to their TFSA ³	No, but a person could make a donation or a loan to their spouse for the latter to contribute to their FHSA ⁵
Is there a penalty for overcontributions?	Yes: 1% per month (a lifetime maximum surplus of \$2,000 is allowed without penalty)	Yes: 1% per month on excess contributions, regardless of when it occurs during the month	Yes: 1% per month on excess contributions, regardless of when it occurs during the month
Are withdrawals taxed? Yes, except for HBP withdrawals		No	No, if they are applied to the purchase of a first eligible home

during retirement?

Your retirement income comes from three main sources: personal savings, private pension plans and government plans.

Government plans usually aren't enough to ensure you can maintain your cost of living during retirement.

Ensure you save enough money to complement the other sources of income!

PERSONAL SAVINGS

Registered and non-registered investments (RRSP, TFSA, etc.), other personal assets (real estate, etc.)

PRIVATE PENSION PLANS

(pension fund with your employer)

GOVERNMENT PLANS

(Quebec Pension Plan (QPP), Canada Pension Plan (CPP), Old Age Security (OAS) pension, etc.)

a withdrawal strategy?

The order in which you withdraw your investments significantly affects the duration of your capital. Usually, it is better to withdraw non-registered (NR) investments first.

Hypothesis: Start-up capital distributed equally in an RRSP, a TFSA and non-registered investments. The portfolio is continually rebalanced to 50% in equities (return of 6.5%; 80% capital gains, 20% dividends) and 50% in fixed income (return of 4%). The calculations are made at the margin, assuming a tax rate of 40% and a special tax treatment of capital gains and dividends.

There is no perfect formula for calculating the ideal age to withdraw your government pension. It is up to you to assess your personal situation and make decisions according to your needs and priorities.

Factors to consider

It is recommended to withdraw early

I anticipate having limited additional sources of income.

I have a **lower** life expectancy (according to my health and family history).

It is recommended to wait a bit longer

I anticipate having multiple sources of income.

I have a **normal** life expectancy (according to my health and family history).

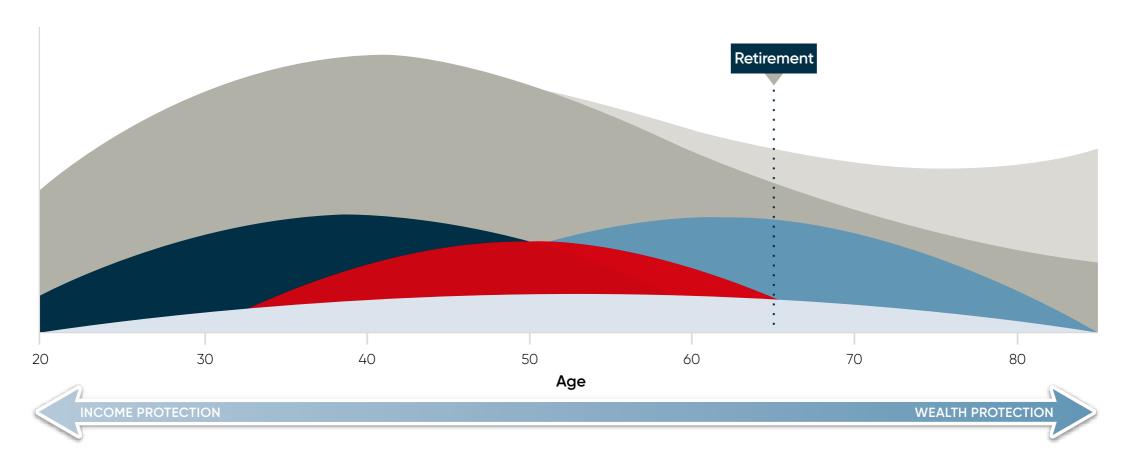

your insurance plan?

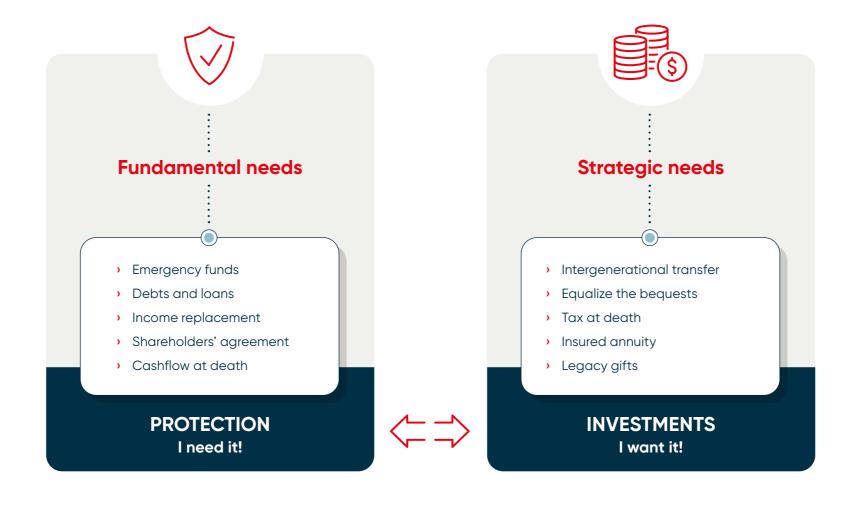

Insurance needs vary with age. It is important to review your coverage to ensure it always suits your needs.

different insurance needs

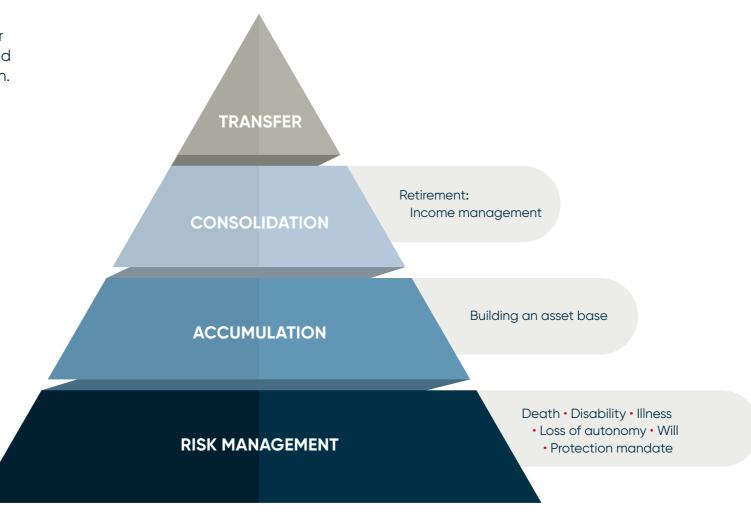

Take the time to thoroughly analyze your insurance needs by distinguishing fundamental characteristics from strategic ones.

Have you thought about

risk management?

Integrate risk management into your financial planning in order to facilitate the growth of your estate, maintain your way of life once retired and bequeath a part of your estate after your death.

Our investment solutions
