Notes on forward-looking statements

This report may contain forward-looking statements concerning the ETF, its future performance, its strategies or prospects or about future events or circumstances. Such forward-looking statements include, among others, statements with respect to our beliefs, plans, expectations, estimates and intentions. The use of the expressions "foresee", "intend", "anticipate", "estimate", "assume", "believe" and "expect" and other similar terms and expressions indicate forward-looking statements.

By their very nature, forward-looking statements imply the use of assumptions and necessarily involve inherent risks and uncertainties. Consequently, there is a significant risk that the explicit or implicit forecasts contained in these forward-looking statements might not materialize or that they may not prove to be accurate in the future. A number of factors could cause future results, conditions or events to differ materially from the objectives, expectations, estimates or intentions expressed in such forward-looking statements. Such differences might be caused by several factors, including changes in Canadian and worldwide economic and financial conditions (in particular interest and exchange rates and the prices of other financial instruments), market trends, new regulatory provisions, competition, changes in technology and the potential impact of conflicts and other international events.

The foregoing list of factors is not exhaustive. Before making any investment decision, investors and others relying on our forward-looking statements should carefully consider the foregoing factors and other factors. We caution readers not to rely unduly on these forward-looking statements. We assume no obligation to update forward-looking statements in the light of new information, future events or other circumstances unless applicable legislation so provides.

This interim management report of fund performance contains financial highlights, but does not contain the complete interim financial statements of the ETF. Management Discussion of Fund Performance

Results of Operations

For the six-month period ended June 30, 2026, the NBI Liquid Alternatives ETF's units returned 6.82% compared to 1.13% for the ETF's benchmark, the FTSE Canada T Bill 91 Days Index. Unlike the benchmark, the ETF's performance is calculated after fees and expenses. Please see the *Past Performance* section for the ETF's returns, which may vary mainly because of fees and expenses.

The ETF's net asset value rose by 67.4% over the period, from $203.42 million as at December 31, 2025 to $340.48 million as at June 30, 2026.

The increase stemmed mainly from investments in the Fund by other NBI Funds. Despite a turbulent start to the year with conflict erupting in the Middle East, equity markets have posted solid returns so far in 2026. Key tailwinds include stellar earnings growth and widespread enthusiasm for artificial intelligence. Against this backdrop, Emerging Markets stood out from the rest of the world, mostly driven by spectacular gains in Taiwan and South Korea, two countries closely tied to the semiconductor value chain through TSMC, Samsung and SK Hynix. The Canadian fixed-income universe delivered much more modest returns in line with yields-to-maturity, despite some bouts of heightened volatility as inflation concerns increased following disruptions in the Strait of Hormuz.

In this context, the Fund outperformed its benchmark. During this period, its three biggest return contributors were Heating Oil, Gasoline, and Brent crude futures positions; its three biggest return detractors were Natural Gas, U. S. 10-year bonds, and U. S. 5-year bonds futures positions.

In the first quarter of 2026, NALT overperformed in absolute terms. During this period, its three biggest return contributors were Heating Oil, Silver, and Brent crude futures positions; its three biggest return detractors were Natural Gas, Canadian Dollar, and U. S. 5-year bonds futures positions.

In the second quarter of 2026, NALT underperformed in absolute terms. During this period, its three biggest return contributors were Canadian Dollar, Japanese Yen, and U. S. 2-year bonds futures positions; its three biggest return detractors were Silver, Gold, and Heating Oil futures positions.

Recent Developments

As of 2026-06-30, NALT's positioning in futures was short in fixed income (except for the 30-year Bond), short in currencies (except for the Australian Dollar), long in energy (except for the Brent crude and WTI crude), long in agriculture (except for the Corn), and long in metals.

There were two quarterly cash distribution for NALT in the first half of 2026. Unitholders of record on March 24, 2026 received $0. 7500 cash distributions on March 31, 2026. Unitholders of record on June 23, 2026 received $0. 5000 cash distributions on June 30, 2026. There were no other distributions for NALT in the first half of 2026. Distributions do not affect the total return but do impact the ex-dividend return.

The portfolio manager base-case scenario continues to anticipate economic growth close to potential, with commodity prices stabilizing and inflation gradually slowing, although the latter is expected to remain above target for some time yet. The positive “Goldilocks” scenario is gaining slightly in credibility, supported by the decline in energy prices and the resilience of the U. S. labour market, while the main downside risk has changed in nature since last quarter. Indeed, the stagflation scenario has given way to one of overheating, in which economic growth remains solid, but inflation becomes more problematic.

From an investor’s perspective, despite the many challenges that remain, the portfolio manager’s view is that the balance of risks continues to favour a risk-on stance.

It is important to recall that NALT’s underlying models are purely quantitative. These models try to capture market trends to favorably direct weekly allocations. It is thus hard to predict the ETF’s strategy for the coming months, except for the punctual and infrequent discretionary decisions. The strategy is strictly bound to respect diverse constraints nonetheless, which keep it in line with NALT’s 3 main objectives: a sustained absolute positive performance, a moderate volatility, and decorrelation to equity markets.

NALT follows a systematic weekly trading strategy. As such, outside of discretionary decisions, the impact on the fund of the weekly changes in positions is but incremental. Although allowed, there were no discretionary decisions in the 6-month period ending 2026-06-30.

On 2026-01-28, the SOFR was removed from NALT's investment universe.

On April 30, 2026, Norman Turnbull resigned as member and President of the ETF’s independent review committee (the “IRC”). On May 1, 2026, Yanic Chagnon was appointed IRC member and Marie Desroches was appointed as President of the IRC.

Related Party Transactions

National Bank Investments Inc. (the "manager") is the manager and promoter of the ETF. Accordingly, it is entitled to receive, in exchange for the services that it provides to the ETF, management fees paid to it by the ETF (see "Management Fees" below).

From time to time, the manager may, on behalf of the ETF, carry out transactions or sign agreements to involve certain persons or companies related to it, to the extent that these transactions or agreements are, in its opinion, in the interest of the ETF. The description of the transactions or agreements between the ETF and a related party is provided in this section.

Members of the manager's group may earn fees or spreads in connection with services provided to, or transactions with, the NBI ETF, including in connection with brokerage and derivatives transactions.

Trustee

The manager has retained the services of Natcan Trust Company to serve as trustee for the ETF and has retained the services of National Bank Investments Inc. to serve as portfolio manager for the ETF.

Agent for securities lending transactions

NTC acts as the agent for securities lending transactions on behalf of the ETF in administering securities lending transactions entered into by the ETF. NTC is an affiliate of the Manager.

Designated Broker

The manager has signed an agreement with National Bank Financial Inc. ("NBF"), a company affiliated with NBI, under which NBF will serve as a designated broker for the ETF. The designated broker agreement signed with NBF is in keeping with market conditions.

Brokerage Fees

The ETF may pay broker’s commissions at market rates to a corporation affiliated with National Bank Investments Inc. The brokerage fees paid by the ETF for the period are as follows:

	Period ended June 30, 2026
Total brokerage fees	$148,566.27

Management Fees

The management fee is payable to the ETF manager in consideration of the services that the manager provides to the ETF in its capacity as manager, such as managing the day-to-day business and affairs of the ETF.

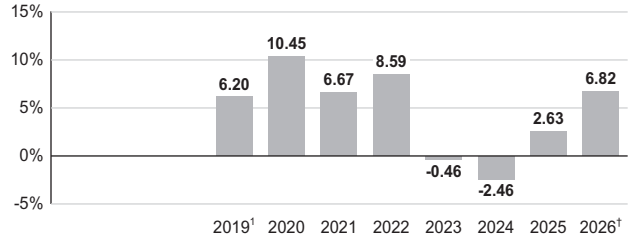
The ETF pays an annual management fee of 0.60% to the ETF manager for its management services. The fees are calculated based on a percentage of the ETF's daily net asset value before applicable taxes and are paid on a monthly basis. The management fees primarily covers investment management and general administration services.

Past Performance

The performance of the ETF, presented below and calculated as at December 31 of each year, is based on the net asset value of the ETF. It assumes that all distributions made in the periods shown were reinvested in additional units of the ETF. These returns do not take into account sales, redemption charges, distributions, or optional charges that would have reduced returns. Past performance of an ETF does not necessarily indicate how it will perform in the future.

Year-by-Year Returns

The bar chart indicates the performance of the ETF for each of the years shown and illustrates how the performance has changed from year to year. It shows, in percentage terms, how much an investment made on January 1 (or made commencing from the start of the ETF) would have grown or decreased by December 31 of that year, in the case of the Annual management report of fund performance, or by June 30, in the case of the Interim management report of fund performance.



(1) Returns for the period from February 8, 2019 (commencement of operations) to December 31, 2019.

(t) Returns for the period from January 1, 2026 to June 30, 2026.

[1] This information is derived from the ETF's Annual Audited Financial Statements and Interim Unaudited Financial Statements. The net assets per unit presented in the financial statements might differ from the net asset value calculated for ETF pricing purposes. The differences are explained in the notes to the financial statements.

[2] The net assets are calculated in accordance with IFRS.

[3] Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase or decrease from operations is based on the average number of units outstanding over the accounting period.

[4] Distributions were paid in cash or reinvested in additional units of the ETF, or both.

[5] This information is provided as at the last day of the accounting period shown.

[6] Management expense ratio is based on total expenses including sales taxes for the accounting period indicated (excluding commission, other portfolio transaction costs and withholding taxes) and is expressed as an annualized percentage of daily average net value during the accounting period. The management expense ratio includes, if necessary, the management expenses from its underlying funds, as described in Article 15.2 of Regulation 81-106.

[7] The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the accounting period. The trading expense ratio includes, if necessary, the trading expenses from its underlying funds, as described in Article 15.2 of Regulation 81-106.

[8] The ETF's portfolio turnover rate indicates how actively the ETF portfolio's manager manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the ETF buying and selling all of the securities in its portfolio once in the course of the accounting period. The higher an ETF's portfolio turnover rate in an accounting period, the greater the trading costs payable by the ETF in the accounting period, and the greater the chance of an investor receiving taxable capital gains in the accounting period. There is not necessarily a relationship between a high turnover rate and the performance of an ETF.

[9] Closing market price on the last trading day of the year as reported on the TSX.
