Notes on forward-looking statements

This report may contain forward-looking statements concerning the Fund, its future performance, its strategies or prospects or about future events or circumstances. Such forward-looking statements include, among others, statements with respect to our beliefs, plans, expectations, estimates and intentions. The use of the expressions "foresee", "intend", "anticipate", "estimate", "assume", "believe" and "expect" and other similar terms and expressions indicate forward-looking statements.

By their very nature, forward-looking statements imply the use of assumptions and necessarily involve inherent risks and uncertainties. Consequently, there is a significant risk that the explicit or implicit forecasts contained in these forward-looking statements might not materialize or that they may not prove to be accurate in the future. A number of factors could cause future results, conditions or events to differ materially from the objectives, expectations, estimates or intentions expressed in such forward-looking statements. Such differences might be caused by several factors, including changes in Canadian and worldwide economic and financial conditions (in particular interest and exchange rates and the prices of other financial instruments), market trends, new regulatory provisions, competition, changes in technology and the potential impact of conflicts and other international events.

The foregoing list of factors is not exhaustive. Before making any investment decision, investors and others relying on our forward-looking statements should carefully consider the foregoing factors and other factors. We caution readers not to rely unduly on these forward-looking statements. We assume no obligation to update forward-looking statements in the light of new information, future events or other circumstances unless applicable legislation so provides.

Management Discussion of Fund Performance

Results of Operations

For the six-month period ended June 30, 2023, the NBI North American Dividend Private Portfolio's Advisor Series units returned 7.76% compared to 9.92% for the Fund's blended benchmark. The broadbased indices, the S&P 500 Index (CAD) and the S&P/TSX Composite Index (CAD), returned 14.16% and 5.70% respectively. Unlike the indices, the Fund's performance is calculated after fees and expenses. Please see the *Past Performance* section for the returns of all of the Fund's series, which may vary mainly because of fees and expenses.

Certain series of the Fund, as applicable, may make distributions at a rate determined by the manager. This rate may change from time to time. If the aggregate amount of distributions in such series exceeds the portion of net income and net realized capital gains allocated to such series, the excess will constitute a return of capital. The manager does not believe that the return of capital distributions made by such series of the Fund have a meaningful impact on the Fund's ability to implement its investment strategy or to fulfill its investment objective.

The Fund's net asset value rose by 8.84% over the period, from \$63.42 million as at December 31, 2022 to \$69.03 million as at June 30, 2023.

Financial markets put aside concerns over growth, inflation, and US regional banks generating strong returns in most equity markets. Canadian GDP was flat in April, but it is expected to reach an annualized pace of 1.4% for the second quarter, while inflation slowed to its weakest pace in two years, rising to 3.4% in May, year-over-year, to match expectations. In Canada, the provincial and corporate sectors broadly outperformed federal bonds, due in part to somewhat attractive valuations and a growing sense that inflation could moderate without the need for a recession.

The Fund underperformed the benchmark over the period. Overall contributors came from stock selection and overweight position in the Consumer Discretionary sector as well as the stock selection and underweight position in the Financials sector. The stock selection and overweight position in the Communication and Services sector as well as our overweight position in the Health Care sector also helped.

The top contributors to performance for the period were Oracle Corp., Restaurant Brands and Microsoft Corp. The top detractors to performance for the period were Verizon Communications, TC Energy Corp and Bank of Nova Scotia.

Recent Developments

Over the period the Fund exited positions in Boyd Group Services Inc., Alimentation Couche-Tard, CAE Inc., LifeWorks Inc., Roche Holding Limited, Comcast Corp, Cognizant Technology Solutions Corp, Fiserv Inc., and RB Global Inc

The Fund initiated new positions in Bank of Montreal, Berry Global Group Inc., Johnson & Johnson, and Tourmaline Oil Corporation.

The Fund is most notable overweight in Information Technology sectors, Healthcare, and Consumer Staples. The Fund is most underweight in the Energy and Materials sectors.

The persistence of recession calls from financial indicators stands in contrast to the real economic indicators which have been slowing but remain at relatively strong levels. Financial markets may be faced with a weaker economic growth environment, which would negatively impact earnings growth, but the portfolio manager expects the positive influence of declining inflation to outweigh the negative influence of slower growth. Given the anticipated slower economic backdrop, the importance of careful security selection is paramount to a successful investment portfolio.

On May 1, 2023, the Fund's independent review committee (the "IRC") was increased to four members when Stéphanie Raymond-Bougie was appointed as IRC member.

The Fund's risk level was modified from "low to medium" to "medium" during the year. This change aims to more accurately reflect the Fund's actual risk level.

Administrative and Operating Services

The provision of certain services was delegated by the Fund Manager, NBII, to National Bank Trust Inc. ("NBT"), a wholly-owned indirect subsidiary of the Bank. These include accounting, reporting and portfolio valuation services. The fees incurred for these services are paid to NBT by the Fund manager.

Management Fees

The Fund pays annual management fees to the Fund manager for its management services. The fees are calculated based on a percentage of the Fund's daily net asset value before applicable taxes and are paid on a monthly basis. Under the *Distribution* heading, expenses include the broker's compensation consisting of the maximum annual trailer fees and sales commissions paid to brokers. Under the *Other* heading, the fees relate mainly to investment management, investment advisory services, general administration and profit. Past performance of a series of a Fund does not necessarily indicate how it will perform in the future.

Annual Returns

The bar charts indicate the performance for each the Fund's series in existence greater than one year during the years shown, and illustrate how the performance has changed from year to year. They show, in percentage terms, how much an investment made on January 1 (or made commencing from the start of the series) would have grown or decreased by December 31 of that year, in the case of the Annual management report of fund performance, or by June 30, in the case of the Interim management report of fund performance.

- (1) This information is derived from the Fund's Annual Audited Financial Statements and Interim Unaudited Financial Statements. The net assets per unit presented in the financial statements might differ from the net asset value calculated for fund pricing purposes. The differences are explained in the notes to the financial statements.
- (2) Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase or decrease from operations is based on the average number of units outstanding over the accounting period.
- $^{(3)}$ Distributions were paid in cash or reinvested in additional units of the Fund, or both.
- $^{(4)}$ The net assets are calculated in accordance with IFRS.
- $^{(\!g\!)}$ This information is provided as at the last day of the accounting period shown.
- (6) Management expense ratio is based on total expenses including sales taxes for the accounting period indicated (excluding commission, other portfolio transaction costs and withholding taxes) and is expressed as an annualized percentage of daily average net value during the accounting period.
- (7) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the accounting period. The trading expense ratio includes, if necessary, the trading expenses from its underlying funds, as described in Article 15.2 of Regulation 81-106.
- (8) The Fund's portfolio turnover rate indicates how actively the Fund portfolio's manager manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the accounting period. The higher a Fund's portfolio turnover rate in an accounting period, the greater the trading costs payable by the Fund in the accounting period, and the greater the chance of an investor receiving taxable capital gains in the accounting period. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.
