Notes on forward-looking statements

This report may contain forward-looking statements concerning the Fund, its future performance, its strategies or prospects or about future events or circumstances. Such forward-looking statements include, among others, statements with respect to our beliefs, plans, expectations, estimates and intentions. The use of the expressions "foresee", "intend", "anticipate", "estimate", "assume", "believe" and "expect" and other similar terms and expressions indicate forward-looking statements.

By their very nature, forward-looking statements imply the use of assumptions and necessarily involve inherent risks and uncertainties. Consequently, there is a significant risk that the explicit or implicit forecasts contained in these forward-looking statements might not materialize or that they may not prove to be accurate in the future. A number of factors could cause future results, conditions or events to differ materially from the objectives, expectations, estimates or intentions expressed in such forward-looking statements. Such differences might be caused by several factors, including changes in Canadian and worldwide economic and financial conditions (in particular interest and exchange rates and the prices of other financial instruments), market trends, new regulatory provisions, competition, changes in technology and the potential impact of conflicts and other international events.

The foregoing list of factors is not exhaustive. Before making any investment decision, investors and others relying on our forward-looking statements should carefully consider the foregoing factors and other factors. We caution readers not to rely unduly on these forward-looking statements. We assume no obligation to update forward-looking statements in the light of new information, future events or other circumstances unless applicable legislation so provides.

Management Discussion of Fund Performance

Results of Operations

For the six-month period ended June 30, 2025, the NBI Global Equity Fund's Investor Series units returned -1.25% compared to 3.86% for the Fund's benchmark, the MSCI World Index (CAD). Unlike the benchmark, the Fund's performance is calculated after fees and expenses. Please see the *Past Performance* section for the returns of all of the Fund's series, which may vary mainly because of fees and expenses.

Certain series of the Fund, as applicable, may make distributions at a rate determined by the manager. This rate may change from time to time. If the aggregate amount of distributions in such series exceeds the portion of net income and net realized capital gains allocated to such series, the excess will constitute a return of capital. The manager does not believe that the return of capital distributions made by such series of the Fund have a meaningful impact on the Fund's ability to implement its investment strategy or to fulfill its investment objective.

The Fund's net asset value dropped by 0.65% over the period, from \$1.422 billion as at December 31, 2024, to \$1.413 billion as at June 30, 2025.

Ongoing tariff pressures, the U.S. government cost-cutting program, the Russia-Ukraine conflict, and weaker consumer confidence led to increased volatility to start the year. With fleeting U.S. military support for traditional allies, European Aerospace & Defence and related companies rallied. European banks also outperformed as the yield curve steepened, creating more accommodative conditions for the sector. The emergence of Chinese-based DeepSeek, along with potential effects from policy uncertainty led to a sell-off in many of the big winners from 2023-2024, predominantly U.S. technology companies/beneficiaries of Al. Meanwhile, the European Central Bank continued cutting rates at its March meeting, and developed international equities outperformed. Global equity markets experienced a severe, short-lived sell-off in mid-March and early April after the Trump administration's announcement of broad "reciprocal" tariffs. Subsequent delays, negotiations, and easing tensions led to renewed bullish sentiment that was also helped by resilient corporate earnings. Global central banks held their interest rates mostly steady, and market participants are closely watching economic data for indications of future policy changes.

In this context, the Fund underperformed its benchmark.

As for the Fund's performance, security selection within the Communication Services, Financials, and Health Care sectors was the primary negative driver. Offsetting this was positive security selection within the Information Technology and Consumer Discretionary sectors.

Recent Developments

During the first half of the year, a position in Copart was initiated using the proceeds from the sale of Becton Dickinson & Company (BDX) and after trimming TSMC. A position in Spirax Group was fully exited as well. The motivation for the Spirax sale was better opportunities elsewhere. As for the BDX exit, the reason was a challenged thesis. In the Portfolio Manager's view, the company has made poor capital allocation decisions and compromised their focus on product safety/quality controls over the years. The BDX sale proceeds were also used to add to positions in Mettler-Toledo, Hilton, and Copart.

Copart is an Industrials company that operates as an online auctioning platform catering to the salvage car industry. Copart acts as a market maker between suppliers of salvage vehicles (primarily insurance companies) and buyers of salvage vehicles (dismantlers and rebuilders). The business owns an extensive network of salvage yards which are difficult to replicate assets. The Portfolio Manager believes the business model has strong network effects, barriers to entry, and robust pricing power that has enabled the company to generate attractive margins and return on invested capital. With favourable market dynamics and strong corporate culture focused on their customers, the Manager believes the company is well positioned for continued market share gains.

Top 5 overweight positions:

Taiwan Semiconductor Manufacturing Co. (8.05%)

Moody's Corporation (6.69%)

AutoZone Inc. (5.68%)

Alphabet Inc. Class A (6.41%)

Mastercard Corporation (5.07%)

Sector and country weights are a residual of the stock selection process.

The Portfolio Manager's investment horizon is best measured in years, conceivably decades, not months or quarters. The focus continues to be on identifying what the Investment Team believes to be high-quality companies with sustainable competitive advantages, operating in industries with high barriers to entry, and contributing to durable pricing power.

On or about May 14, 2025, National Bank Investments Inc. ("NBI") replaced National Bank Trust Inc. ("NBT") as portfolio manager of the Fund. The investment objectives of the Fund remain unchanged. This change has no impact on the sub-advisor currently making investment decisions for the Fund.

Therefore, NBI provides or ensures the provision of all general management and administrative services required by the Fund's current operations, including investment consulting, the arrangement of brokerage contracts for the purchase and sale of the investment portfolio, bookkeeping and other administrative services required by the Fund.

The Manager pays the operating expenses of the Fund other than its "Fund costs" (defined below) (the "variable operating expenses"), in exchange for the Fund's payment to the Manager of annual fixed-rate administration fees with respect to each series of the Fund.

The administration fees are equal to a specified percentage of the net asset value of each series of the Fund, calculated and paid in the same manner as the Fund's management fees. The variable operating expenses payable by the Manager include, but are not limited to: transfer agency and recordkeeping costs; custodial costs; accounting and valuation fees; audit fees and legal fees; costs of preparing and distributing financial reports, simplified prospectuses, annual information forms, Fund Facts, continuous disclosure material and other securityholder communications; and costs of trustee services relating to registered tax plans, as applicable.

In addition to administration fees, the Fund shall also pay certain Fund costs, namely: taxes (including, but not limited to, GST/HST and income taxes); costs of compliance with any changes to existing governmental or regulatory requirements introduced after August 1, 2013; costs of compliance with any new governmental or regulatory requirements, including any new fees introduced after August 1, 2013; interest and borrowing costs; costs related to external services that were not commonly charged in the Canadian mutual fund industry as at August 1, 2013; Independent Review Committee costs, including compensation paid to IRC members, travel expenses, insurance premiums and costs associated with their continuing education; and variable operating expenses incurred outside of the normal course of business of the Fund.

The Manager may, from time to time and at its sole discretion, decide to absorb a portion of a series' management fees, administration fees or Fund costs.

As described under the heading *Management Fees*, the Fund pays annual management fees to NBI as consideration for its services.

Brokers may receive, depending on the distributed series, a monthly commission representing a percentage of the average daily value of the securities held by their clients.

Brokerage Fees

The Fund may pay broker's commissions at market rates to a corporation affiliated with NBI. The brokerage fees paid by the Fund for the period are as follows:

	Period ended June 30, 2025
Total brokerage fees	\$62,098.15
Brokerage fees paid to National Bank Financial	-

As at June 30, 2025, National Bank Investments Inc. held 15,290.21 Fund securities for a value of \$199,297.36, which represented close to 0.0413% of the net asset value of the Fund at that date. Transactions between National Bank Investments Inc. and the Fund were carried out in the normal course of business and at the Fund's net asset value as at the transaction date.

Registered Plan Trust Services

NTC receives a fixed amount per registered account for services provided as trustee for registered plans.

Administrative and Operating Services

The provision of certain services was delegated by the Fund Manager, NBI, to National Bank Trust Inc. ("NBT"), a direct and indirect whollyowned subsidiary of the Bank. These include accounting, reporting and portfolio valuation services. The fees incurred for these services are paid to NBT by the Fund manager.

Management Fees

The Fund pays annual management fees to the Fund manager for its management services. The fees are calculated based on a percentage of the Fund's daily net asset value before applicable taxes and are paid on a monthly basis. Under the *Distribution* heading, expenses include the broker's compensation consisting of the maximum annual trailer fees and sales commissions paid to brokers. Under the *Other* heading, the fees relate mainly to investment management, investment advisory services, general administration and profit. The breakdown of major services provided in consideration of the management fees, expressed as an approximate percentage of the management fees is as follows:

(i) This information is derived from the Fund's Annual Audited Financial Statements and Interim Unaudited Financial Statements. The net assets per unit presented in the financial statements might differ from the net asset value calculated for fund pricing purposes. The differences are explained in the notes to the financial statements.

(2) Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase or decrease from operations is based on the average number of units outstanding over the accounting period.

Distributions were paid in cash or reinvested in additional units of the Fund, or both.

(a) The net assets are calculated in accordance with IFRS.

This information is provided as at the last day of the accounting period shown.

Management expense ratio is based on total expenses including sales taxes for the accounting period indicated (excluding commission, other portfolio transaction costs and withholding taxes) and is expressed as an annualized percentage of daily average net value during the accounting period. The management expense ratio includes, if necessary, the management expenses from its underlying funds, as described in Article 15.2 of Regulation 81-106.

The trading expenses ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the accounting period. The trading expense ratio includes, if necessary, the trading expenses from its underlying funds, as described in Article 15.2 of Regulation 81-106.

The Fund's portfolio turnover rate indicates how actively the Fund portfolio's manager manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the accounting period. The higher a Fund's portfolio turnover rate in an accounting period, the greater the trading costs payable by the Fund in the accounting period, and the greater the chance of an investor receiving taxable capital gains in the accounting period. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.
