## Management Discussion of Fund Performance

### Results of Operations

For the six-month period ended June 30, 2021, the NBI *SmartBeta* Global Equity Fund's Investor Series units returned 2.93% compared to 9.88% for the Fund's benchmark, the MSCI World Index (CAD). Unlike the benchmark, the Fund's performance is calculated after fees and expenses. Please see the *Past Performance* section for the returns of all of the Fund's series, which may vary mainly because of fees and expenses.

The Fund's net asset value rose by 8.75% over the period, from \$656.43 million as at December 31, 2020 to \$713.85 million as at June 30, 2021.

Global equities moved higher over the six-month period ending June 30, 2021. The global economy faced challenges as it recovered over the period. Europe, Japan and the UK posted declines in economic growth during the first quarter, while the U.S., Canada and China expanded.

As lockdown restrictions eased and non-essential businesses began to reopen, business activity improved over the second quarter. Global manufacturing and services sector activity expanded during the period. Consumer prices rose substantially, which raised concerns about the global economic recovery and brought on some volatility in equity markets. Most central banks tried to assure investors that inflation was transitory. Major global central banks held their key interest rates steady during the period, with a few, including the U.S. Federal Reserve (the "Fed"), suggesting policy rate increases could come sooner than expected.

Within the MSCI World Index, which returned +9.88% during the period, the best performing sectors were Energy (+28.69%), Financials (+17.31%) and Real Estate (+13.52%). The worst-performing sectors within the index were Utilities (-3.02%), Consumer Staples (+2.25%) and Health Care (+6.84%).

In this environment, the NBI *SmartBeta* Global Equity Fund underperformed its benchmark, the MSCI World Index, during the first half of 2021. The portfolio, designed with its defensive posture, will typically underperform a market-capitalization benchmark during rising market conditions. The Fund's underperformance was in part due to its underweight exposure and security selection in the Financials sector over the period. An underweight position and security selection within the Information Technology sector also detracted from the Fund's relative performance.

At the individual stock level, the Fund position in non-benchmark holding Agricultural Bank of China Ltd. detracted from its performance as the company's share price fell in response to China's crackdown on cryptocurrency trading. From a country perspective, the Fund's underweight position and security selection in the United States detracted from its relative performance.

### Recent Developments

The Fund rebalances its portfolio on a quarterly basis, utilizing an investment approach that selects stocks with lower-risk characteristics and weights each stock equally by risk. This approach emphasizes defensive sectors over cyclical as well as lower-risk countries over riskier ones.

The Fund's largest overweight allocations at the end of the period versus the benchmark were to Consumer Staples (15.7% vs. 7.0%), Health Care (17.6% vs. 12.5%) and Utilities (6.9% vs. 2.7%), while the largest underweight allocations were to Information Technology (11.2% vs. 22.1%), Financials (9.2% vs. 13.4%) and Consumer Discretionary (9.0% vs. 12.0%). At the country level, the largest overweight allocation was to Japan (17.6% vs. 6.7%), while the largest underweight allocation was to the United States (43.6% vs. 67.4%).

As a systematic risk-based manager, the portfolio manager does not forecast future market events or use expectations of future events to influence or change the strategy. Rather, the portfolio manager consistently and systematically applies a strategy that puts risk management at the heart of the portfolio construction process by selecting stocks with lower risk characteristics and weighing all stocks so that each contributes an equal amount of risk. The objective of this approach is to seek outperformance with less volatility over a full market cycle relative to market-capitalization weighted strategies.

On April 30, 2021, the Fund's independent review committee (the "IRC") was reduced to three members when Yves Julien resigned as IRC member. On May 1, 2021, the Fund's IRC was increased to four members when Paul Béland was appointed as IRC member.

The administration fees are equal to a specified percentage of the net asset value of each series of the Fund, calculated and paid in the same manner as the Fund's management fees. The variable operating expenses payable by the Manager include, but are not limited to: transfer agency and recordkeeping costs; custodial costs; accounting and valuation fees; audit fees and legal fees; costs of preparing and distributing financial reports, simplified prospectuses, annual information forms, Fund Facts, continuous disclosure material and other securityholder communications; and costs of trustee services relating to registered tax plans, as applicable.

The Manager may, from time to time and at its sole discretion, decide to absorb a portion of a series' management fees, administration fees or Fund costs.

As described under the heading *Management Fees*, the Fund pays annual management fees to NBII as consideration for its services.

- Purchasing or holding the securities of a related issuer, in particular, those of National Bank of Canada;
- Investing in the securities of an issuer when an entity related to the manager acts as an underwriter for the placement or at any time during the 60-day period after the end of the placement;
- Purchasing or selling securities to another investment Fund managed by the manager or a company in the same group;
- Purchasing or selling debt securities on the secondary market, through related brokers that are main brokers in the Canadian debt securities market (in accordance with an exemption received from the Canadian Securities Administrators);
- Entering into foreign exchange transactions (including both spot transactions and forward transactions) with National Bank of Canada.

The Manager has implemented policies and procedures to make sure that the conditions applicable to each of the above transactions are met. The applicable standing instructions require that these transactions be carried out in accordance with NBII policies, which specify, in particular, that investment decisions pertaining to these related party transactions must be made free from any influence by an entity related to NBII and without taking into account any consideration relevant to an entity related to NBII. Furthermore, the investment decisions must represent the business judgment of the securities advisor, uninfluenced by considerations other than the best interest of the Fund and must achieve a fair and reasonable result for the Fund.

### Registered Plan Trust Services

NTC receives a fixed amount per registered account for services provided as trustee for registered plans.

### Administrative and Operating Services

The provision of certain services was delegated by the Fund Manager, NBII, to National Bank Trust Inc. ("NBT"), a wholly-owned indirect subsidiary of the Bank. These include accounting, reporting and portfolio valuation services. The fees incurred for these services are paid to NBT by the Fund manager.

### Management Fees

The Fund pays annual management fees to the Fund manager for its management services. The fees are calculated based on a percentage of the Fund's daily net asset value before applicable taxes and are paid on a monthly basis. A portion of the management fees paid by the Fund covers maximum annual trailer fees and sales commissions paid to brokers. The remainder of the management fees primarily covers investment management and general administration services. The breakdown of major services provided in consideration of the management fees, expressed as an approximate percentage of the management fees is as follows:

### Past Performance

The performance of each series of the Fund is presented below and calculated as at December 31 of each year. It assumes that all distributions made in the periods shown were reinvested in additional securities and does not take into account sales, redemption charges, distributions, or optional charges that would have reduced returns. Past performance of a series of a Fund does not necessarily indicate how it will perform in the future.

## Annual Returns

The bar charts indicate the performance for each the Fund's series in existence greater than one year during the years shown, and illustrate how the performance has changed from year to year. They show, in percentage terms, how much an investment made on January 1 (or made commencing from the start of the series) would have grown or decreased by December 31 of that year, or by June 30, as applicable.

- <sup>(4)</sup> The net assets are calculated in accordance with IFRS.
- <sup>(5)</sup> This information is provided as at the last day of the accounting period shown.
- <sup>(6)</sup> Management expense ratio is based on total expenses including sales taxes for the accounting period indicated (excluding commission, other portfolio transaction costs and withholding taxes) and is expressed as an annualized percentage of daily average net value during the accounting period.
- <sup>(7)</sup> The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the accounting period. The trading expense ratio includes, if necessary, the trading expenses from its underlying funds, as described in Article 15.2 of Regulation 81-106.
- <sup>(8)</sup> The Fund's portfolio turnover rate indicates how actively the Fund portfolio's manager manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the accounting period. The higher a Fund's portfolio turnover rate in an accounting period, the greater the trading costs payable by the Fund in the accounting period, and the greater the chance of an investor receiving taxable capital gains in the accounting period. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.
