ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE

For the period ended December 31, 2025

Meritage Income Portfolio

Meritage Conservative Income Portfolio

Notes on forward-looking statements

This report may contain forward-looking statements concerning the Portfolio, its future performance, its strategies or prospects or about future events or circumstances. Such forward-looking statements include, among others, statements with respect to our beliefs, plans, expectations, estimates and intentions. The use of the expressions “foresee”, “intend”, “anticipate”, “estimate”, “assume”, “believe” and “expect” and other similar terms and expressions indicate forward-looking statements.

By their very nature, forward-looking statements imply the use of assumptions and necessarily involve inherent risks and uncertainties. Consequently, there is a significant risk that the explicit or implicit forecasts contained in these forward-looking statements might not materialize or that they may not prove to be accurate in the future. A number of factors could cause future results, conditions or events to differ materially from the objectives, expectations, estimates or intentions expressed in such forward-looking statements. Such differences might be caused by several factors, including changes in Canadian and worldwide economic and financial conditions (in particular interest and exchange rates and the prices of other financial instruments), market trends, new regulatory provisions, competition, changes in technology and the potential impact of conflicts and other international events.

The foregoing list of factors is not exhaustive. Before making any investment decision, investors and others relying on our forward-looking statements should carefully consider the foregoing factors and other factors. We caution readers not to rely unduly on these forward-looking statements. We assume no obligation to update forward-looking statements in the light of new information, future events or other circumstances unless applicable legislation so provides.

This annual management report of fund performance contains financial highlights, but does not contain the complete annual financial statements of the investment fund. You can get a copy of the annual financial statements at your request, and at no cost, by calling 1-866-603-3601, by writing to us at investments@nbc.ca, by visiting our website at www.nbinvestments.ca, by visiting SEDAR+’s website at www.sedarplus.ca, or by contacting your advisor. You may also contact us using one of these methods to request a copy of the Portfolio’s proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

Management Discussion of Fund Performance

Investment Objective and Strategies

The Meritage Conservative Income Portfolio's investment objective seeks to achieve a current income and some capital appreciation over the medium-term by investing primarily in a diverse mix of fixed income and equity mutual funds.

The portfolio manager's target weighting for this Portfolio is 60-80% of net assets invested in Canadian and global fixed income securities and 20-40% of net assets invested in Canadian and global equity. This weighting may be reviewed and adjusted based on economic and market conditions. The portfolio manager may, in its sole discretion, select the underlying funds, allocate assets to the underlying funds, change the percentage holding of any underlying fund, remove any underlying fund or add other underlying funds. The Portfolio may also invest in mutual funds that hold small-cap stocks.

Risks

The global investment risk of the Portfolio remains as described in the simplified prospectus or any amendments thereto and Fund Facts.

Results of Operations

For the twelve-month period ended December 31, 2025, the Meritage Conservative Income Portfolio's Advisor Series units returned 6.17% compared to 9.80% for the Portfolio's blended benchmark. The broad-based indices, the Morningstar® Canada Liquid Bond Index (CAD) and the Morningstar® Developed Markets Large-Mid Cap Index (CAD), returned 3.26% and 16.22% respectively. Unlike the indices, the Portfolio's performance is calculated after fees and expenses. Please see the *Past Performance* section for the returns of all of the Portfolio's series, which may vary mainly because of fees and expenses.

The Portfolio's net asset value dropped by 8.89% over the period, from $87.92 million as at December 31, 2024 to $80.10 million as at December 31, 2025.

In 2025, the resilience of the global economy and the absence of a worrying rise in inflation enabled equity markets to maintain an upward trajectory, posting above-average gains for the third consecutive year.

More specifically, global equities (+22.9% for the MSCI ACWI) outperformed their historical average and far outpaced the Canadian bond universe (+2.4%). Unlike in 2024, stock market leadership in 2025 was firmly outside the United States. The S&P 500 (+17.9%) significantly underperformed the S&P/TSX (+31.7%), the MSCI EAFE (+31.9%) and the MSCI Emerging Markets (+34.4%). In Canada, the S&P/TSX was buoyed in part by the spectacular performance of gold miners amid a sharp rise in the price of gold (+62.5%).

In fixed income, risk appetite favored Canadian corporate bonds (+4.3%) over government bonds (+2.0%). The same was true in the United States, where high-yield bonds (+8.5%) outperformed Treasury bonds (+6.2%). Finally, the US dollar depreciated significantly (-9.4% for the DXY index) during the year, against a backdrop of new tariffs imposed by the Trump administration and deteriorating investor sentiment toward U.S. assets.

In this context, the Fund underperformed its benchmark. The Beutel Goodman Canadian Dividend Fund, the BMO Dividend Fund, and the RBC Canadian Dividend Fund brought the most value to the Portfolio during the period. The Sun Life MFS Growth Fund contributed the least value to the Portfolio's overall return over the period.

Recent Developments

On January 28, 2025, changes were made to the Portfolio in order to optimize it. Given this context, the CI Canadian Bond Fund, the TD Canadian Core Plus Bond Fund, the RBC Canadian Dividend Fund, and the Capital Group Global Equity Fund were reduced. These Funds were replaced by the increase in the RP Strategic Income Plus Fund, and the Manulife Strategic Income Fund, and the addition of the Beutel Goodman Canadian Dividend Fund, the GF American Growth Fund, the PH&N Overseas Equity Fund, the Sun Life MFS Global Growth Fund, the TD Global Equity Focused Fund, and the RBC Emerging Markets Equity Fund.

For 2026, the manager's baseline scenario forecasts sustained economic growth in 2026, supported by monetary easing and expansionary fiscal measures. However, risks remain, both on the downside and upside. On the negative side, a further deterioration in the labor market would be problematic, especially if the current dynamic of "low hiring and low layoffs" shifted toward more significant layoffs. On the positive side, higher-than-expected productivity gains from investments in artificial intelligence could support economic growth while containing inflationary pressures. However, with so many accommodative measures in place, any disappointment on the productivity front could reignite fears of economic overheating.

In this context, the manager maintains a moderately favorable stance on risk through an overweight position in equities relative to fixed income.

Within equities, the manager maintains an overweight position in Canadian and Emerging Market equities, reflecting strong relative momentum, positive earnings prospects, and a sector composition well suited to the current environment. Conversely, the manager is underweight in equities from the EAFE region, where earnings growth prospects are less favorable.

On January 28, 2025, the blended benchmark was modified to better reflect the categories of assets in which the Fund invests. The current blended benchmark is composed of the Morningstar® Canada Liquid Bond Index (CAD) (70%), the Morningstar® Canada Large-Mid Index (CAD) (21%) and the Morningstar® Developed Markets Large-Mid Cap Index (CAD) (9%). The previous blended benchmark was composed of the Morningstar® Canada Liquid Bond Index (CAD) (80%) and the Morningstar® Canada Large-Mid Index (CAD) (20%). The current broad-based indices are the Morningstar® Canada Liquid Bond Index (CAD) and the Morningstar® Developed Markets Large-Mid Cap Index (CAD). The previous broad-based index was the Morningstar® Canada Liquid Bond Index (CAD).

On or about May 14, 2025, National Bank Investments Inc. ("NBI") replaced National Bank Trust Inc. ("NBT") as portfolio manager of the Fund. The investment objectives of the Fund remain unchanged. This change has no impact on the sub-advisor currently making investment decisions for the Fund.

Related Party Transactions

National Bank of Canada ("the Bank") and its affiliated companies' roles and responsibilities related to the Portfolio are as follows:

Trustee, Custodian and Registrar

Natcan Trust Company ("NTC"), an indirect wholly-owned subsidiary of the Bank, is the Portfolio's trustee. In this capacity, it is the legal owner of the Portfolio's investments.

NTC also acts as the Portfolio's custodian, registrar and transfer agent. The Manager pays NTC for its services as custodian based on the assets held by the Portfolio. In addition, a flat fee per transaction is paid to NTC. With respect to the registrar and transfer agent services for the Portfolio, a fixed annual amount is paid to NTC by the Manager.

Agent for securities lending transactions

NTC acts as the agent for securities lending transactions on behalf of the Portfolio in administering securities lending transactions entered into by the Portfolio. NTC is an affiliate of the Manager.

Manager

As described in the *Management Fees* section, the Portfolio pays annual management fees to National Bank Investments Inc. (the "Manager") in consideration for management services. The management fees cover mainly the Manager's costs of managing the Portfolio's investments. The Manager is an indirect wholly-owned subsidiary of National Bank of Canada (the "Bank").

Since October 29, 2013, the Manager pays the operating expenses of the Portfolio other than its "portfolio costs" (defined below) (the "variable operating expenses"), in exchange for the Portfolio's payment to the Manager of annual fixed-rate administration fees with respect to each series of the Portfolio.

The administration fees are equal to a specified percentage of the net asset value of each series of the Portfolio, calculated and paid in the same manner as the Portfolio's management fees. The variable operating expenses payable by the Manager include, but are not limited to: transfer agency and recordkeeping costs; custodial costs; accounting and valuation fees; audit fees and legal fees; costs of preparing and distributing financial reports, simplified prospectuses, annual information forms, fund facts, continuous disclosure material and other securityholder communications; and costs of trustee services relating to registered tax plans, as applicable.

In addition to administration fees, the Portfolio shall also pay certain portfolio costs, namely: taxes (including, but not limited to, GST/HST and income taxes); costs of compliance with any changes to existing governmental or regulatory requirements introduced after August 1, 2013; costs of compliance with any new governmental or regulatory requirements, including any new fees introduced after August 1, 2013; interest and borrowing costs; costs related to external services that were not commonly charged in the Canadian mutual fund industry as at August 1, 2013; Independent Review Committee costs, including compensation paid to IRC members, travel expenses, insurance premiums and costs associated with their continuing education; and variable operating expenses incurred outside of the normal course of business of the Meritage Portfolios.

The Manager may, from time to time and at its sole discretion, decide to absorb a portion of a series' management fees, administration fees or Portfolio costs.

Portfolio Manager

The Manager has appointed National Bank Investments Inc. ("NBI"), an indirect wholly-owned subsidiary of the Bank, as the portfolio manager for the Portfolio. NBI acts as both Manager and portfolio manager of the Portfolio.

Distribution and Dealer Compensation

Portfolio securities are offered by National Bank Direct Brokerage (a division of National Bank Financial Inc., an indirect wholly owned subsidiary of the Bank), National Bank Financial Inc. and other affiliated entities. Each month, brokers receive a commission representing a percentage of the average daily value of the securities held by their clients. In addition, when Advisor Series securities are purchased, brokers usually receive a commission, which varies depending on the sales charge option chosen at the time of investment.

Brokerage Fees

The Portfolio may pay broker's commissions at market rates to a corporation affiliated with National Bank Investments Inc. The brokerage fees paid by the Portfolio for the period are as follows:

	Period ended December 31, 2025
Total brokerage fees	$373.65
Brokerage fees paid to National Bank Financial	$373.65

Holdings

As at December 31, 2025, National Bank Investments Inc. held 181.92 Portfolio securities for a value of $1,781.86, which represented close to 0.0017% of the net asset value of the Portfolio at that date. Transactions between National Bank Investments Inc. and the Portfolio were carried out in the normal course of business and at the Portfolio's net asset value as at the transaction date.

Administrative and Operating Services

NBT provides the Portfolio with certain services, including accounting, reporting and portfolio valuation services. The costs incurred for these services are paid by the Manager to NBT.

Management Fees

The Portfolio pays annual management fees to the Manager in consideration for management, portfolio advisory and administrative services and facilities required by the Portfolio in its day-to-day operations. As the Portfolio invests in underlying funds, the fees and expenses payable in connection with the management of the underlying funds are in addition to those payable by the Portfolio. However, the Manager makes sure that the Portfolio does not pay any management (or operating) fees that, to a reasonable person, would duplicate a fee payable by the underlying fund for the same service.

The management fees are calculated as a fixed percentage of the Portfolio's daily net asset value, are accrued on a daily basis and are paid monthly. The Portfolio is required to pay applicable taxes on the management fees.

Under the heading *Distribution*, expenses include the broker's compensation consisting of the maximum annual trailer fees and sales commissions paid to brokers. Under the heading *Other*, the fees relate mainly to investment management, investment advisory services, general administration and profit. The breakdown of the main services received in consideration for the management fees, as a percentage of the management fees collected from the Portfolio, is as follows:

Series	Management Fees	Distribution	Others[†]
Advisor Series*			
Front-end load**	1.45%	51.72%	48.28%
Series F	0.70%	—	100.00%
Series O	N/A***	—	100.00%

[(†)] Includes all costs related to management, investment advisory services, general administration and profit.

[(*)] Excluding sales commissions paid on the Advisor Series with the low sales charge option and deferred sales charge option, which are not included in the management fees.

[(**)] Rate applicable for all investments, including Advisor Series existing before May 14, 2015, systematic investment programs, reinvested distributions and switches.

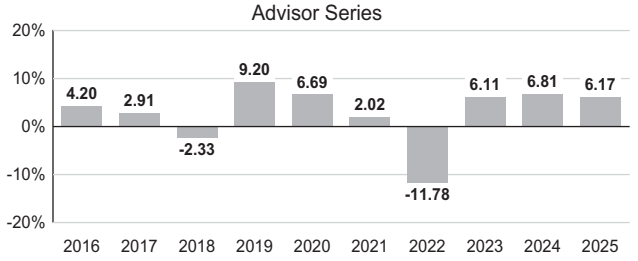
[(***)] The Series O is only available to selected investors that have been approved and have entered into an O Series units account agreement with National Bank Investments Inc. The criteria for approval may include the size of the investment, the expected level of account activity and the investor's total investments with NBI. No management fees are charged to the portfolio with respect to the O Series units. Management fees are negotiated with and paid directly by investors and are in addition to the fixed-rate administration fee. NBI does not pay any commissions or service fees to dealers who sell O Series units. There are no sales charges payable by investors who purchase O Series units.

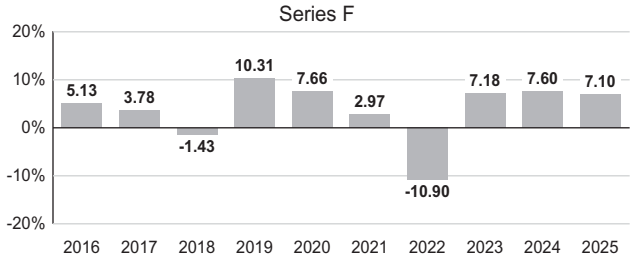
Past Performance

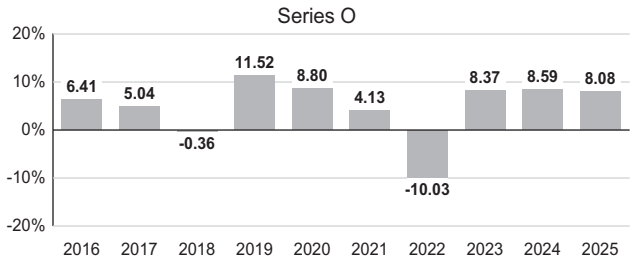
The performance of each series of the Portfolio presented below is calculated as of December 31 of each year. It assumes that all distributions made in the periods shown were reinvested in additional securities and does not take into account sales, redemption charges, distributions, or optional charges that would have reduced returns. Past performance of a series of the Portfolio does not necessarily indicate how it will perform in the future.

Annual Returns

The bar charts indicate the performance for each of the Portfolio's series in existence greater than one year during the years shown, and illustrate how the performance has changed from year to year. They show, in percentage terms, how much an investment made on January 1 (or made commencing from the start of the series) would have grown or decreased by December 31 of that year, in the case of the Annual management report of fund performance, or by June 30, in the case of the Interim management report of fund performance.







Annual Compounded Performance

The following table shows the Portfolio's annual compound returns for each series in existence greater than one year and for each of the periods ended on December 31, 2025, compared with the following benchmarks:

The blended benchmark (the “Benchmark”) is composed of:

- Morningstar® Canada Liquid Bond Index (CAD) (70%)
- Morningstar® Canada Large-Mid Index (CAD) (21%)
- Morningstar® Developed Markets Large-Mid Cap Index (CAD) (9%)

The broad-based indices are as follows:

- Broad-based index 1: Morningstar® Canada Liquid Bond Index (CAD)
- Broad-based index 2: Morningstar® Developed Markets Large-Mid Cap Index (CAD)

A discussion of the Portfolio's relative performance in comparison to the index (or indices) can be found in the *Results of Operations* Section of this report.

Index Descriptions

The **Morningstar® Canada Liquid Bond Index** offers diversified exposure to federal debt securities guaranteed by the federal government, to provincial debt securities guaranteed by the provincial government and to corporate debt securities denominated in Canadian dollars in order to maintain liquidity. Small issuances, issuances with limited terms and issuances with credit ratings lower than those of investment-grade securities are excluded from the index.

The **Morningstar® Canada Large-Mid Index** measures the performance of Canadian stock exchanges by targeting 90% of shares, based on their order of importance in terms of market capitalization.

The **Morningstar® Developed Markets Large-Mid Cap Index** is a subset of large- and mid-cap stocks included in the Morningstar® Developed Markets Index, a broad-based index that represents 97% of the market capitalization of developped markets.

The benchmark was modified to better reflect the categories of assets in which the Portfolio invests. The information related to the previous benchmark is presented below.

The previous blended benchmark was composed of:

- Morningstar® Canada Liquid Bond Index (CAD) (80%)
- Morningstar® Canada Large-Mid Index (CAD) (20%)

The previous broad-based index was the Morningstar® Canada Liquid Bond Index (CAD).

[1] This information is derived from the Portfolio's Annual Audited Financial Statements. The net assets per unit presented in the financial statements might differ from the net asset value calculated for fund pricing purposes. The differences are explained in the notes to the financial statements.

[2] Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase or decrease from operations is based on the average number of units outstanding over the accounting period.

[3] Distributions were paid in cash or reinvested in additional units of the Portfolio, or both.

[4] The net assets are calculated in accordance with IFRS.

[5] This information is provided as at the last day of the accounting period shown.

[6] Management expense ratio is based on total expenses including sales taxes for the accounting period indicated (excluding commission, other portfolio transaction costs and withholding taxes) and is expressed as an annualized percentage of daily average net value during the accounting period. The management expense ratio includes, if necessary, the management expenses from its underlying funds, as described in Article 15.2 of Regulation 81-106.

[7] The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the accounting period. The trading expense ratio includes, if necessary, the trading expenses from its underlying funds, as described in Article 15.2 of Regulation 81-106.

[8] The portfolio's turnover rate indicates how actively the Portfolio's manager manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Portfolio buying and selling all of the securities in its portfolio once in the course of the accounting period. The higher a portfolio's turnover rate in an accounting period, the greater the trading costs payable by the Portfolio in the accounting period, and the greater the chance of an investor receiving taxable capital gains in the accounting period. There is not necessarily a relationship between a high turnover rate and the performance of a Portfolio.
