Note 1: Estimates for these products will be available as of November 30.

Distributions are paid to investors in relation to the number of units they hold of a fund on a "record date". The record date is generally the business day prior to the distribution date.

We calculated the estimations in proportion to income dated October 31, 2024 as an estimate for the end of the year distribution. Some volatile elements, such as gains or losses generated through the potential closure of foreign exchange contracts, were excluded from the estimate. This document is provided for information only. These estimates can change rapidly and abruptly depending on the transactions done by the manager.

The information and the data supplied in the present document, including those supplied by third parties, are considered accurate at the time of their printing and were obtained from sources which we considered reliable. We reserve the right to modify them without advance notice. This information and data are supplied as informative content only. No representation or guarantee, explicit or implicit, is made as for the exactness, the quality and the complete character of this information and these data. The opinions expressed are not to be construed as solicitation or offer to buy or sell shares mentioned herein and should not be considered as recommendations.

NBI Funds, NBI Portfolios, NBI Sustainable Portfolios, NBI Private Portfolios and NBI ETFs (the "Funds") are offered by National Bank Investments Inc., an indirect wholly owned subsidiary of National Bank of Canada. The NBI Portfolios and the NBI Sustainable Portfolios are sold by National Bank Savings and Investments Inc., a separate entity and indirect wholly owned subsidiary of National Bank of Canada. The NBI Funds and NBI ETFs are sold by authorized dealers. The NBI Private Portfolios are distributed by National Bank Financial, an indirect wholly owned subsidiary of National Bank of Canada.

Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus of the Funds before investing. Securities of the Funds are not insured by the Canada Deposit Insurance Corporation or by any other government deposit insurer. The Funds are not guaranteed, their values change frequently, and past performance may not be repeated. ETF units are bought and sold at market price on a stock exchange and brokerage commissions will reduce returns. NBI ETFs do not seek to return any predetermined amount at maturity.

For F5 and T5 Series units, the Funds make monthly distributions, comprised of a return of capital component. A return of capital reduces the value of the original investment and is not the same as the return on the investment. Returns of capital that are not reinvested may reduce the net asset value of the portfolio and the portfolio's subsequent ability to generate income. The monthly amount of the distributions is set by multiplying the net asset value per share at the end of the previous calendar year by 5% and dividing the result by 12.
